

Country report for ESTONIA

Estonian Health Insurance Fund

Something about passed year

The PX-Web database was established in April 2017 and all tables are presented only in Estonian. Statistical databases are accessible in the Internet at the web-site <https://statistika.haigekassa.ee/>

We use PX-Web only for publishing in the internet to all people with interest

Information and experiences

We use PX-Web 2017 version 1 and we use PC-Axis main module, PX-Edit and PX-Web. For now all of PX files are converted from Excel tables by database managers.

Problems and/or good news

We have structured our data and uploaded many new reports.

Something you would like to show or discuss at the meeting?

I would like to see how practical work is done. When you already have many years of data and you want to add 1 more year with many figures, how is done. Maybe I am inventing bicycle ? ☺
